Apps

Folio Stocks — *Software Engineer*

Folio Stocks is a game that lets you buy, sell stocks and compete with your friends. There are leagues with teams and the team that makes the most money wins.

- Employed React, Redux and React-router to achieve a responsive User interface
- Engaged with Postgres and Sequelize for data querying and retrieval
- Implemented Pusher for an instant chat with live data interaction

On the Road — *Software Engineer*

On the Road is a tool for people to plan their trips by showing in the map campsites where to stay.

- Used VueJS, Vuex and Vue-router to achieve a responsive User interface.
- Leveraged NodeJS and Express for efficient communication of the database and the client-side.
- Applied MySQL and Sequelize for efficient querying and data retrieval.
- Implemented user authentication with Passport Google OAuth2.

Radma — *Software Engineer*

Radma is a tool for those who love music. Interactive app that lets you interact with local bands by adding events, saving events and streaming shows.

- Refactor and inherit code base with React, React Hooks and Sequelize to deliver extra joined data.
- Utilized NodeJS and Express for fast and efficient route-handling.
